### • ABOUT ME

Enthusiastic and self-motivated Front-End Web Developer with a solid foundation in HTML, Bootstrap, Tailwind CSS, JavaScript, and React. Passionate about creating responsive and user-friendly websites. Strong problem-solving skills developed through learning Data Structures and Algorithms in C++. Eager to contribute and grow in a dynamic development team.

### • EDUCATION

2024 - 2027 Bachelor of Computer Applications

VNSGU

2021 - 2024 10<sup>TH</sup> AND 12<sup>TH</sup> - SUNGRACE SCHOOL

### • PROJECTS

### • PROJECTS

#### • Portfolio Website

Developed a personal portfolio website to highlight my skills, projects, and achievements as a Full Stack Developer. The website features a clean and responsive design with smooth animations, an interactive interface, and SEO-friendly structure. Built using HTML, CSS, JavaScript, and Bootstrap, it includes dedicated sections for About Me, Projects, Resume, and Contact. This project helped me strengthen my front-end development and UI design skills.

#### • Lab Management System

Created a web-based Lab Management System to streamline and digitalize the management of lab records. The system allows CRUD operations for handling student details, equipment data, and lab reports with secure user authentication and real-time data storage. Developed using HTML, CSS, Bootstrap, and JavaScript (with Firebase/localStorage), it provides an organized dashboard for efficient lab operations. This project enhanced my problem-solving, logic building, and backend integration skills.
